Education

Full Stack Flex Program

University of Sydney

October 2019 - April 2020

COSC2452 Introduction to Programming

RMIT University

June 2019 – August 2019

Bachelor of Engineering (Mechanical), Diploma in Engineering Practice

University of Technology

Graduated December 2013

Technical Skills

- JavaScript
- HTML
- CSS
- API
- Node.js
- Python
- Microsoft Office
- Office 365
- Revit
- CADWorx
- Autodesk Inventor
- Solidworks
- AutoCAD Mechanical
- Pro- Engineer
- Rhinoceros

Personal Summary

A highly motivated and hardworking individual, who is seeking a challenging role as an entry-level full stack web developer with your Company. My interest, passion and enjoyment in coding, programming, Cloud Computing and Virtualization, will enable me to learn, contribute and excel in the Web Development Industry. My ability to learn new coding languages and programs enables me to understand coding concepts quickly which can then be transferred and utilized in developing user-friendly web-based applications using html, css, javaScript, bootstrap, jQuery and many more coding languages and concepts.

Experience

Freelance Web Developer/ IT Technician

2017 - Present

- Provide IT support and troubleshooting for clients of small to medium businesses including computer equipment set-up, network configuration, installing software, minor repairs and computer parts ordering.
- Set-up and install router, host, and software configurations in order to enable internet, file sharing, and printer set-up over the network. Installed and configured range extenders to boost the Wi-Fi signal for mobile devices.
- Using problem solving techniques and elimination processes in order to rectify issues such as loss of internet connection, unable to install operating systems/ programs, computer lagging/ crashes. Some issues were resolved by replacing the connection cables, re-formatting the drive to the correct partition type, or replacing the HDD with an SSD.
- Format/ partition/ clone drives in order to install operating systems from scratch such as Windows, Mac OS, and Android.
- Perform system back-up and data recovery in order to re-install software programs and files to new or upgraded computers.
- Replace/ Upgrade computer components such as cases, fans, CPU, memory, motherboards, power supplies, hard drives and SSD in various devices such as PC, iMac, Laptop, MacBook and Tablets.
- Write code for simple applications such as media libraries and required Tonne calculation for landscaping materials using JavaScript.

Landscaper

2016 - Present

- The Companies that I worked for were **Starr Landscapes** and **Dr.Treegood**.
- Responsible for estimating planning and carrying out various tasks.
- Developed knowledge of installing irrigation systems.
- Ensure that all work is being done in compliance with the Company's protocols.

Mechanical Draftsperson

2007 - 2015

- During my University studies, I undertook various contract roles in between University semesters in a number of different industries including power, electrical, transport, mining, sheet metal fabrication, automation processes, and testing equipment.
- The Companies that I worked for were **ABB Transmission & Distribution**, **Ryan Wilks**, **Design Resource**, **Inbye Mining Services**, and **AH Fabrications**.
- Used AutoCAD to revise and produce mechanical and electrical drawings for various substation projects according to client specifications.
- Used Solidworks to modify components for Transformer Enclosure Assemblies which consisted of sheet metal work and then producing a Bill of Materials (BOM's) and full set of manufacturing drawings from the 3D model.
